This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

TABLES.

TABLES

FOR CALCULATING THE COST

OF

Iron and other Substances sold by Weight,

WITH ESPECIAL REFERENCE TO

ENGINEERING AND MECHANICAL WORKS,

BY

W. L. SIMPSON.

LONDON:
SIMPKIN AND MARSHALL.

MDCCCLI.

UNIVERSITY OF CALIFORNIA LIBRARY

PREFACE.

THE system now almost universally adopted at large Public Works, in this and other countries, of measuring periodically the works completed, or materials supplied, and making payments to the contractor of a per-centage of their value, as ascertained by a schedule of prices previously tendered by him; while it has undoubtedly economised the total cost of such works, has nevertheless occasioned an increase, both in the number, and complexity of the necessary calculations.

This is especially the case where iron or other substances whose cost is estimated by their weight, are the materials principally employed in construction.

The absence of a decimal system of notation in the weights and measures of England, renders the process of calculating the value of a given number of Cwts., Qrs., and lbs. from a price per Cwt., liable from its complication to frequent errors, and where great accuracy is required, (as in the case of the public money,) and the amount of such calculations is considerable, the requisite degree of exactness can only be obtained by transmitting them through several hands, each of whom subjects them to an independent examination.

The Author having personally experienced the inconvenience and loss of time thus occasioned, has endeavoured to obviate both, by the following tables, in which the price of each Cwt. up to thirty, and of each quarter and pound are given at all prices per Cwt., from one shilling to £5, at intervals of sixpence.

Thus by inspection and an addition so simple as to be easily performed mentally, the price of any number of Cwts., Qrs.,

and lbs., can be immediately obtained with an accuracy which entirely dispenses with the necesssity of employing additional checks.

The price of every pound is given in £ s. d., and in £ s. d. and decimals. The first column will probably be found sufficiently accurate for all ordinary calculations; the second is added to meet cases where it is necessary to approximate within closer limits.

When the decimals are not precisely equivalent to the farthing, halfpenny, or three farthings, they have been expressed by the farthing above or below such price, according as they were of greater or less value than the intermediate eighth.

The construction and use of the tables are so simple, that it will only be necessary to state further, that though the Author principally contemplated in the compilation of them their usefulness to the engineering and mechanical world, yet, at the same time he doubts not, but that they will be found of eminent service to

those who are engaged in every department of the arts and manufactures.

The tables were prepared originally with great care, but to ensure entire accuracy, without which they would be useless, the manuscript has been revised three times by different persons; the Author believes therefore, that few, if any errors will be found; but he would be obliged, if such should be discovered during their use, by the immediate communication of them to him for correction.

Engineer's Office,
Portland Breakwater.
